

## **Risk notification**

In most cases, margin trading is associated with large and fast profits, which makes one forget about the risks. There is an unwritten rule: the greater the profit, the greater the risks. Thus, the exact amount that a Client can earn is also the amount that can be lost. In this document, the Company discloses the concept of risk and possible reasons for risks.

### **Example of trading with CFD contracts**

Company X is a publicly traded company whose shares are listed on the New York Stock Exchange. You believe that Company X's shares, listed on the exchange, are undervalued and that their price will rise. The price is quoted as BID 95 ASK 100. This means you can sell at 95 dollars or buy at 100 dollars. The difference between the price at which you can sell and the price at which you can buy is called the «spread». You decide to buy 10 CFDs on Company X's shares at a price of 100 dollars per CFD. Thus, your position totals 1000 dollars. The amount required to open the transaction depends on the margin leverage. For example, with a leverage of 1:5, the required margin is 20%, which is 200 dollars. The profit you will receive on this initial requirement depends on the price at which you decide to close your position (i.e., when you sell the CFD). If the price changes by 1%, the result on the open trade will change by 10% thanks to the leverage.

For a positive experience, we recommend taking the trading course published in your personal account.

### **Risk Disclosure**

1.1 High risk is a distinctive feature of trading activities on financial markets. Professional market participants trade at their own risk of

losing a certain portion of financial resources. When trading CFDs, there are no (and cannot be) guarantees of profit or loss prevention. Neither the Company nor its representatives can provide such guarantees.

1.2 The size of the margin leverage and the volume of trades affect the outcome of the transaction. The higher the margin leverage and trade volume, the higher the potential profit and risks.

1.3 Any decisions regarding CFD trading should be made based on one's own knowledge and past experience. If a Client takes a position contrary to market movement, they may lose their entire deposit amount, and funds lost during trading cannot be returned to the client's account.

1.4 The Company provides content on its website that is informative and educational and is not a recommendation for action.

1.5 For CFD trading, the Company may request information from the Client about their financial assets and income. Ultimately, it is the Client's responsibility to determine whether their financial resources and risk level are sufficient for these investments.

1.6 The Client bears full responsibility for any potential loss of financial resources. It is the Client who chooses the trading strategy and analyzes the possibility of encountering risky situations. Therefore, one should not risk an amount greater than they are willing to lose.

### **Other Risks in FOREX**

2.1 All risks associated with force majeure events are assumed by the Client. These include: terrorist acts, military actions, sudden halts in

trading on financial markets, natural disasters, changes in legislative framework, etc.

2.2 The Company disclaims responsibility for actions of third parties that may hinder productive cooperation between the Company and the Client. Communication risks caused by unauthorized access of third parties to confidential information. If the Company fails to provide or timely provide information to the Client, all financial risks lie with the Client. It is in their interest to protect it from unauthorized access by third parties.

2.3 The Company strives to provide liquidity and continuous access to the trading platform during the trading sessions specified on the website. However, the risk of financial losses may arise due to device failures, Internet disruptions, or software malfunctions. The Company is not responsible for losses or missed opportunities incurred by clients due to technical system failures.

By agreeing to this Notification, you declare that you understand the risks associated with CFD trading (including those described above), that you are willing and able to assume these risks, and that the loss of your account balance will not harm your lifestyle. The Company is not responsible for decisions made by Clients based on information published on the company's website or partner websites. The company does not provide recommendations for making transactions. The company does not take responsibility for decisions made by clients based on information published on the company's website or partner websites. The company does not provide recommendations for making transactions.
